✓ Solution: Handle the Overwrite Dialog in AutoIt

Here's an improved script that:

1. Sends the filename.
2. Waits briefly.
3. If overwrite dialog appears → Sends {LEFT}{ENTER} to select **Yes**.

✓ Updated AutoIt Script (Overwrite Support):

autoit

Copy code

```
; Wait for the PDF window to open (Edge/Chrome class)
WinWaitActive("[CLASS:Chrome_WidgetWin_1]", "", 10)
```

```
; Open print dialog (Ctrl + P)
Send("^p")
Sleep(2000)
```

```
; Press Enter to use default printer
Send("{ENTER}")
Sleep(2000)
```

```
; Generate a random number
Local $rand = Int(Random(1000, 9999))
Local $filename = "Saved_Print_" & $rand & ".pdf"
```

```
; Type the file name
Send($filename)
```

i want save by one file name but every time
